

Bioconvergence: a unique combination of capabilities

Bioconvergent Healthtech Ecosystem

Multidisciplinary capabilities

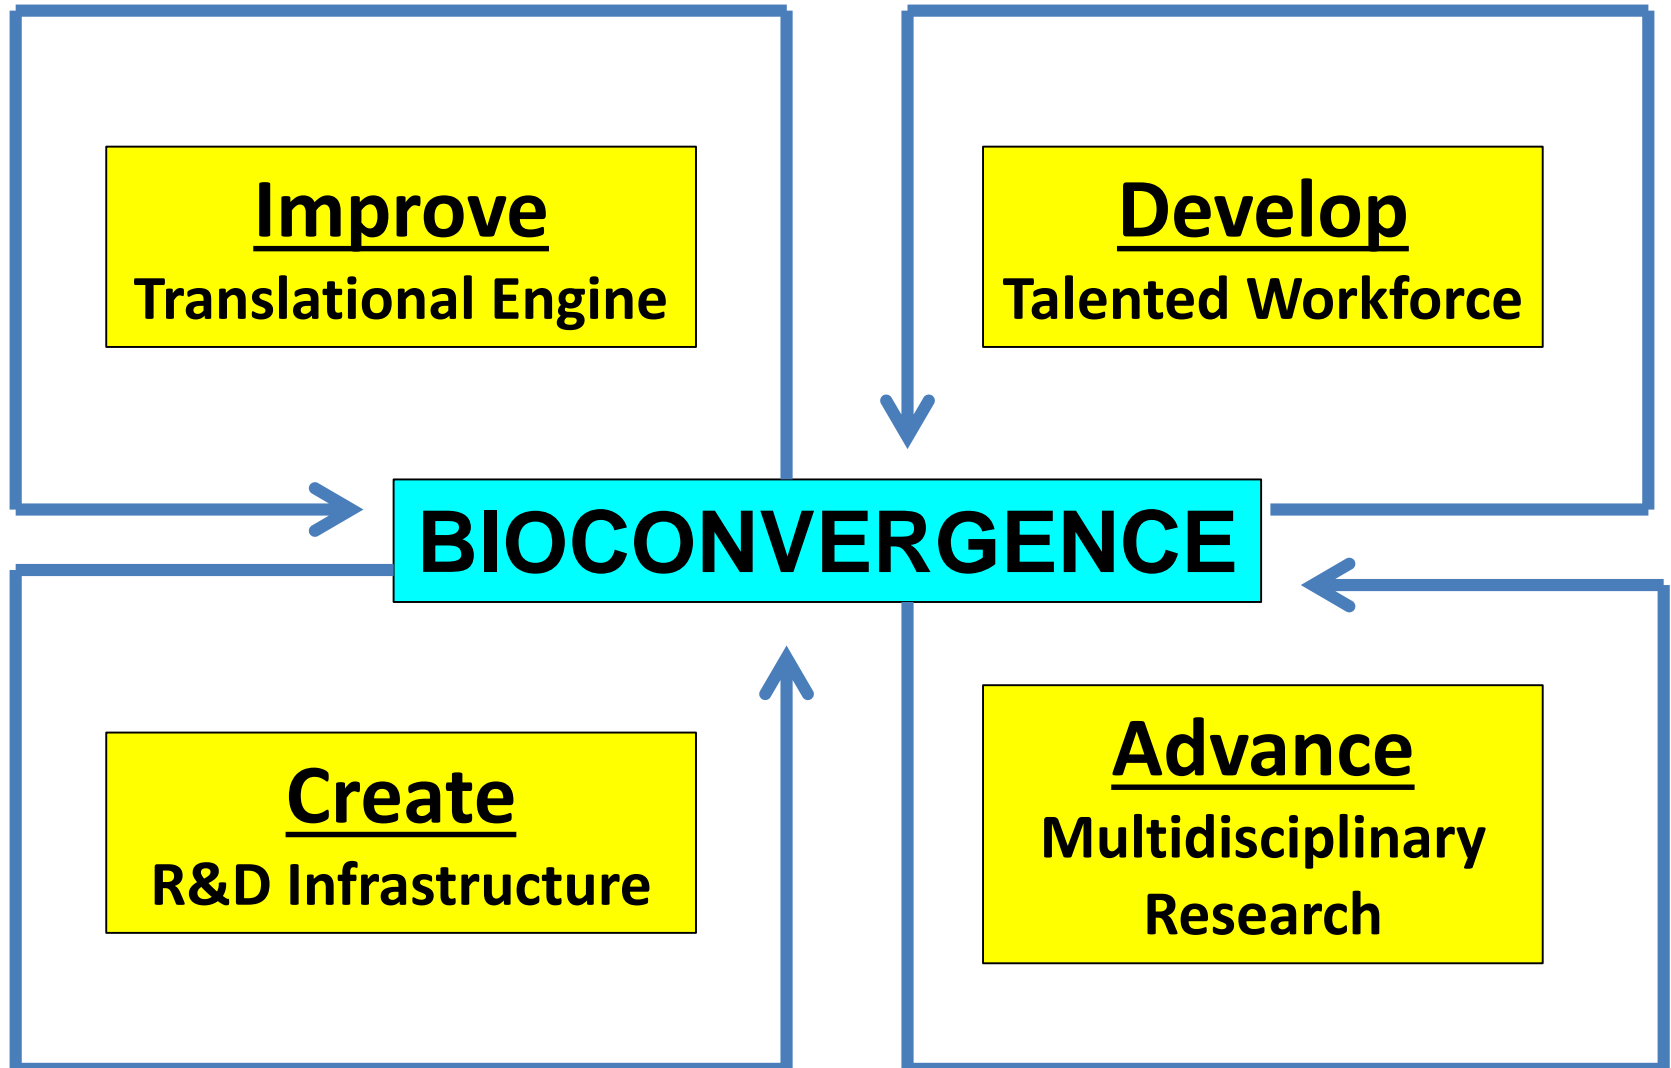

Excellence in Biopharma research

Strenghts in AI health capabilities

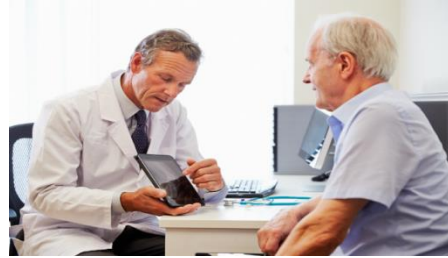

Established Medtech industries

Top research Medical Centers

4 steps to a successful plan

Success will create significant impact

RESEARCH

- Advance multidisciplinary research
- Attract leading scientists

HEALTH

- Novel holistic solutions for population

ECONOMY

- Sustainable growth engine

Italy: a strategy for preserving a competitive positioning

Plan of action:

- Infrastructures development
- Investment in R&D
- Creation of economic value.

First Level: Innovation infrastructures

- Fostering skilled personnel
- Investment in research infrastructures
- Development of financing initiatives
- Utilization of all pools of potential personnel (expatriates)

Second Level: Technological value creation

- Addressing the market failures of R&D
- Participation in risk
- Bridging «Finance death valley»

Third Level: Economic value capture

- Encourage the establishment of collaboration with global companies
- Development of a suitable finance and regulatory infrastructure
- Expand the supply of credit to life sciences/healthtech companies
